

## Technical equipping of events

## *Long story short*

**For 9 years “SmartServices” has been engaged in different kind of services including selling and renting audio/visual, presentation and computer equipment.**

We are able to:

- ▶ show a video on a screen of any size;
- ▶ fill any room with sound;
- ▶ fill up a conference with office equipment and register guests without fuss and crush;
- ▶ attract attention of the visitors by way of interactive solutions;
- ▶ implement a video communication anywhere in the World;
- ▶ equip an event of any level with technology and provide with specialists.

Our job is to bring your idea to life!

# Touch systems

## The strength is in the fingertip

The solution is ideal for use as an electronic assistant for presentations, conferences, exhibitions, etc. The information becomes more accessible, understandable whereas the presentation itself turns to be modern and interesting.

# Touch systems

## Interactive video wall Laser Touch

- The system can be assembled on different surfaces starting with small screens, ending with projection panels.
  - Absolutely any surface can become interactive. Whether it is a wall of an apartment house or an automobile.
  - The system can be used in any light. Even in the day light.
  - An unlimited number of users can simultaneously interact with the system.
- We can as well equip the interactive surface with Wi-Fi module in case of need.

## *Touch panels from 32" to 55"*

### **This is so touching!**

The best use of interactive technology in terms of price and quality.

→ | **A large** ← screen size provides with the best visibility and accuracy of contact. It allows you to play games, view presentations, photos, 3D objects and much more.

Wall, floor or tabletop placing is possible.

## *Touch monitor 17", 19" and 22"*

**LCD monitor, with antiglare touch screen.**

Wall, stand or frame mounting is possible.  
Monitors can be equipped with both laptops/  
desktop computers and compact PCs for the  
playback of the content.

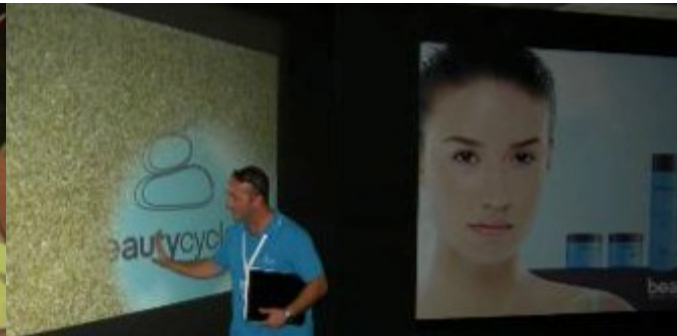

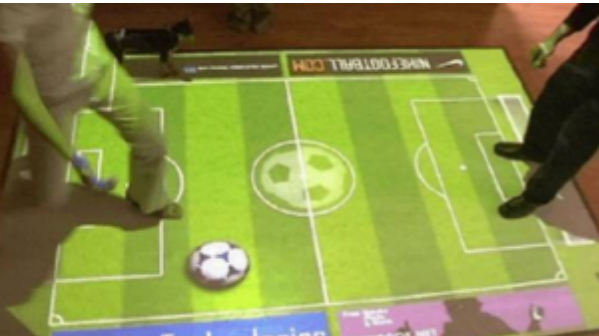

## *Projection system*

### **Interactive projection system Eagles Hightech and Miracle Touch.**

Makes any surface interactive whether it is floor, wall or shopwindow...

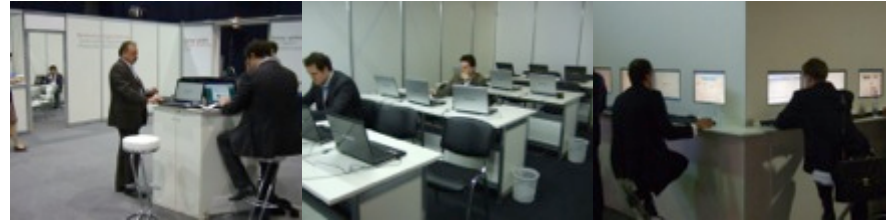

# Computers and laptops

## A place where information lives

We have a wide range of diverse computer equipment and peripherals:

- ▶ Laptops
- ▶ System blocks and 19 – 22 inches monitors
- ▶ Micro computes
- ▶ Badge printers
- ▶ Color and B/W MFDs and printers
- ▶ Systems of bar code scanning
- ▶ Apple iPad
- ▶ Xbox game consoles

We will provide an event of any level, from exhibition to international forum, with the equipment.

## *Discussion systems*

**Makes communication convenient in any way.**

“Round table” system makes you feel comfortable controlling the course of the discussion when an interactive voting system is a sure help in making a prompt decision.

Simultaneous translation can work both independently and together with a system of “round table”

A video conference system permits any number of participants to remotely take part in the discussion.

## *The system of sync-translation of speech*

### **— Did you understand me?**

The system provides each visitor of your event with real-time translation.

#### **The system includes:**

- ▶ Remote control receivers
- ▶ The central equipment and infrared transmitters
- ▶ A case for remote controls
- ▶ EURO Standard booths for the interpreters
- ▶ Remote controls for the interpreters

# Computers and laptops

## A place where information lives

We equip your press center with the latest technology.

- ▶ Laptops
- ▶ System blocks and 19 – 22 inches monitors
- ▶ Micro computers
- ▶ Badge printers
- ▶ Color and B/W MFDs and printers
- ▶ Systems of bar code scanning
- ▶ Apple iPad
- ▶ Xbox game consoles

# Registration systems

**Cloakroom is where the theater begins, while registration is the first place for the conference.**

We can help in making the registration process convenient for both participants and you.

We offer you a pre-web-registration for the visitors of your event. You just need to put the code on your site.

You can view and edit any information on the registered visitors using the exhibition administrator's login and password. You can as well fulfill a mailing on registered users.

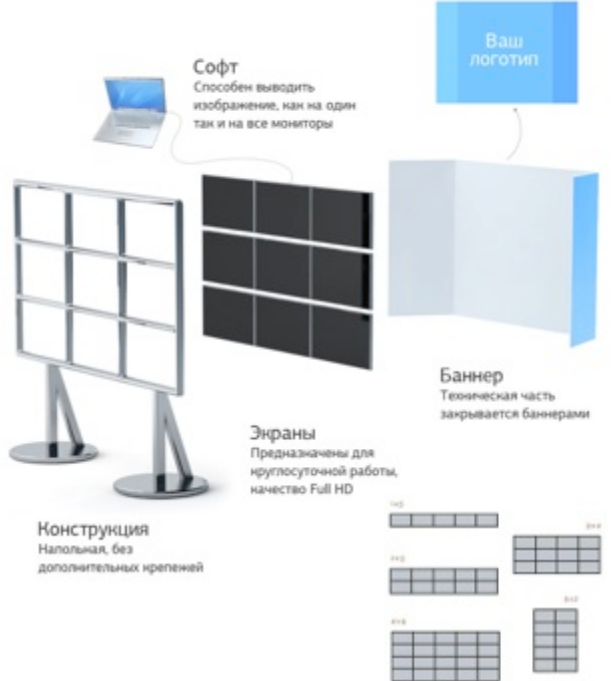

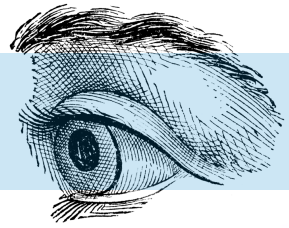

Pre-web-registered visitor of the event receives a barcode by email which allows him to get a badge in the registration area without delay.

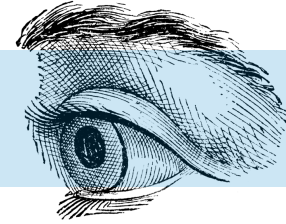

# Display systems

**Different technologies. Any size.  
High quality.**

We offer a display system that suits best for your event: LED, projection and panoramic screens, video walls, multiple screen systems.

# Display systems

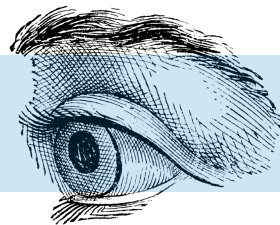

The company “SmartServices” presents a new solution for shaping narrow-bezel high-resolution video walls based on 460 SAMSUNG Ut LFD panels.

Unlike the Orion PDP 4220 plasma, Samsung 460Ut has a 46 inches diagonal, is not afraid of a static image, has a lower power consumption and is more resistant to mechanical effect.

New professional panels have increased brightness which enable their use for exhibitions, concerts and presentations.

6,7 mm bezel. All-purpose fastener, designed and manufactured specially for putting a screen on the floor, hang it up on the winch or mount on the wall.

## Display systems

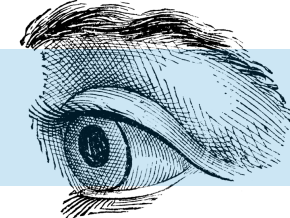

### **New Samsung UD55A LED panels with 55 inches screen diagonal**

The panels are the display systems of next generation with 1920x1080 Full HD resolution.

New Samsung LED panel is lighter (24kg), easy to install and maintain, and more cost-efficient than its competitors.

The maximum panel advantage is disclosed using the video wall: a larger panel size and smaller total thickness of the frame (5.5 mm), compared to previous models.

# Display systems

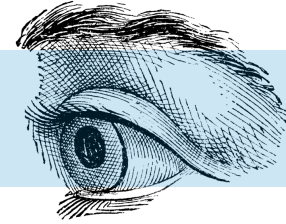

## Samsung LED professional panel.

We offer an LED panel with 32 to 65 inches diagonal. Different ways of mounting and suspension allow you to use it for presentations, exhibitions, forums and other events.

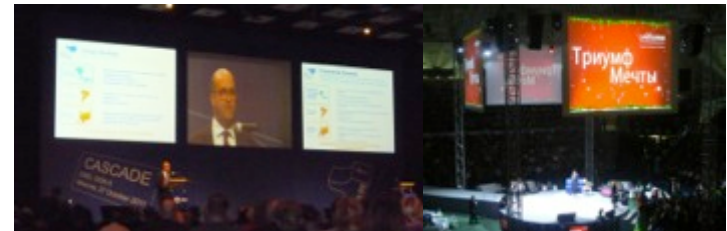

# Display systems

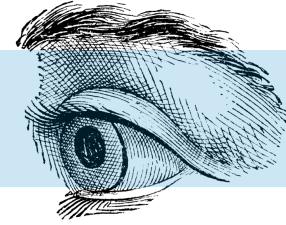

## Screens and projectors

The use of the projection equipment for presentations, demonstrations, videos, interactive and decorative image creation for events of any kind is of current interest nowadays. It is used mainly for art installations i.e. forming images on a non-standard projection surfaces such as a building wall or an automobile. Our company is capable of working with projections of any complexity taking into account the formation and optimization of videos under working conditions.

The best image quality is achieved by using the viewing surface for front or rear projection. The selection of a viewing surface type is determined by the location of the screen and the ability to install the projector.

## *Display systems*

### **LED (light-emitting diode) screens**

This solution suits best for concerts and show programs. LED displays are composed of a set of modules that enable to vary the shape and size of a ready-made screen, depending on the image.

# Display systems

## Complex images

There are such tasks that are performed using sophisticated switching equipment and powerful video servers.

These tasks could be: creation of panoramic, high resolution images; projection on complex geometric objects; creation of multi-window images; multi-threaded data management for creating a show program – audio/video stream, control signals of dynamic light.

It is possible to pass a partial show program control to a host or any participant of the event through a touch screen, interactive system and even through iPad or iPhone.

# Sound equipment

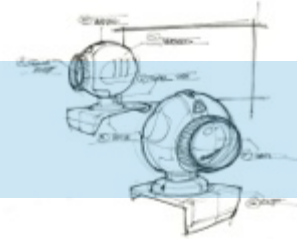

## Events sound support systems

We will calculate and choose a professional sound equipment for your event.

# *Videoconferences and television bridges*

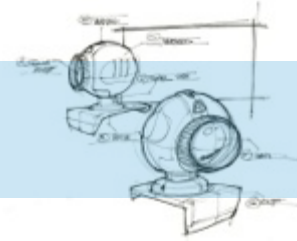

## **Organization of videoconferences, Internet-broadcasting and television bridges.**

Internet Broadcasting provides with the following features:

- ▶ SD or HD quality audio/video transmission using average web camera or a TV OB Van.
- ▶ synchronous recording of the streams, and its subsequent publication in the Internet in the shortest period of time.
- ▶ designing (branding) of a web page.
- ▶ feedback via chat, voice (during the webinar).
- ▶ Stream transmission with simultaneous translation.
- ▶ registration of the audience, the provision of paid access.

# *Videoconferences and television bridges*

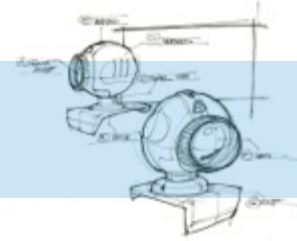

## **Broadcasting, videoconferences, television bridges of business and training events.**

Opens up a possibility to gather a large audience and implement a real-time communication with remote subscribers.

# *Videoconferences and television bridges*

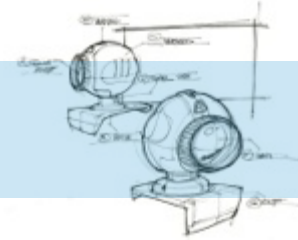

## **Internet Broadcast of show programs**

A greater number of people will be able to observe your event.

It is possible to post a broadcast on your website.

# *Videoconferences and television bridges*

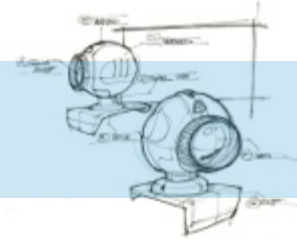

## **Multilateral television bridges**

It is possible to gather several remote subscribers in one communication session and run this conference from one working location.

# *Videoconferences and television bridges*

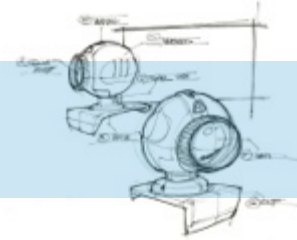

## **Working with the system of video conference communication.**

We can implement a communication in any place of the globe if it is technically possible. This solution allows to solve problems in visual communication with remote subscribers.

*We are trusted*

**Thank you for your attention!**
